

### MainScreen

| My Tasks | Other Tasks |
|----------|-------------|
| Online   | Offline     |
| Task 1   | 01/01/2012  |
| Task 2   | 01/02/2012  |
| Task 3   | 01/03/2012  |
| Task 4   | 01/04/2012  |
| Task 5   | 01/05/2012  |
| New Task |             |

**My Tasks** – Show the current users tasks.

**Other Tasks** – Shows tasks posted by other users.

**Online Tasks** – Is used in combination with **My Tasks/Other Tasks** buttons to show either the current users or other users task which are stored online.

**Offline** – Similar to **Online** button but displays tasks that have been stored offline on the device.

**New Task** – Switches to the **NewTask** Screen.

**Selecting a Task** – Clicking on a currently listed task will switch to the **ViewTask** Screen.

### NewTask Screen

|  |                      |
|--|----------------------|
| <b><u>Name</u></b>                               | <input type="text"/> |
| <b><u>Description</u></b>                        | <input type="text"/> |
| <input checked="" type="radio"/> Photo Task      |                      |
| <input checked="" type="radio"/> Text Based Task |                      |
| <input type="checkbox"/> Share Online            |                      |
| Cancel   | Save                 |

**Name Textbox** – Users enter name of the task the would like to create.

**Description Textbox** – User enters a description of the task that the user is creating.

**Photo Task/Text Based Task** – Users chooses for the task to be either photo based or text based, meaning only photos or text will be attached to a task.

**Share Online Checkbox** – User checks this if he/she wants the task to be saved online and shared with other users. If the box is not checked no one else will see the task.

### ViewTask Screen

|  |      |
|--|------|
| Fulfill Task                           | Back |
| <div>Texture Description of Task</div> |      |
| View Previously Added Content          |      |
| Notify Creator                         |      |
| Store Offline                          |      |

**Back** – Returns user to the MainScreen.

**Fulfill Task** – Depending on whether the task is photo or text based the app will switch to either AddPhoto or AddText Screen.

**Textual Description** – description of the task that the uploader added in the NewTask Screen.

**View Previously Added Content** – Switches to the PreviouslyAddedContent Screen.

**Notify Creator** – Sends a notification to the creator of the task and adds any changes you made to the task to the server.

**Store Offline** – Stores a copy of the task onto the users device. If the task is already stored offline, the button will change to store online.

### AddText Screen

|             |                      |
|-------------|----------------------|
| Add Text    |                      |
| Title       | <input type="text"/> |
| Author      | <input type="text"/> |
| <div></div> |                      |
| Cancel      | Save                 |

**Textbox (Title)** – users enters a title for his/her text.

**Textbox (Author)** – user enters the author of the text he/she is adding to the task, can be the user itself or if the text is from someone else the user can give credit to them.

**Textbox (Main)** – user enters text he/she would like to add to the task.

**Cancel** – returns the user to the ViewTask Screen.

**Save** – saves the text in the text box and adds it to the current task with an automatically generated timestamp.

### AddPhoto Screen

|   |                          |
|---|--------------------------|
| Add Photos  |                          |
|  | Previews of Added Photos |
| Add Photo   |                          |
| Cancel  | Save                     |

Shows a preview of photos the user has uploaded, with their titles and photographers.

**Add Photo** – take user to AddPhoto2 Screen.

**Cancel** – returns user to ViewTask Screen.

**Save** – adds all photos in the preview section to the current task.

### AddPhoto2 Screen

|              |  |
|--------------|--|
| Add Photos   |  |
| Upload Photo |  |
| Take Photo   |  |
| Cancel       |  |

**Upload Photo** – user will be prompted to select a photo to upload, and give it a title and a photographer.

**Take Photo** – camera will open and user will take a photo, then the user will be asked whether or not to use the photo or retake it. If the user chooses to use it they will be asked to provide a title for it as well as a photographer.

**Cancel** – returns user to the AddPhoto Screen.

After a picture is selected or taken successfully the user is taken back to the AddPhoto Screen.

### PreviouslyAddedContent Screen

(\*) if photo based task

Task Name

Title 1  
Photographer 1  
Timestamp 1

Title 2  
Photographer 2  
Timestamp 2
